

The crypto operating system.

Trade. Track. Hold. Earn — across 15 exchanges, 20 chains, and the most secure mobile wallet shipped.

Investor Brief · April 2026 · xetaai.io

THE PROBLEM

Crypto is fragmented. Users juggle six apps to do what should take one.

Trading

Exchange UIs, signal services, bot platforms, charting tools — all separate, all paid separately.

Custody

Hot wallets that leak data, hardware wallets without mobile flow, and zero protection against coercion attacks.

Visibility

Portfolios scattered across chains and venues with no unified view.

Every category is a \$100M+ business. Nobody has unified them.

Four products. One ecosystem.

TRADING

TradeSuite

Bot trading platform. 15 exchanges (CEX + DEX). 6 bot types including ATR Dynamic Grid. Webhook-driven hedge bots, fail-safe risk layer, copy-trading marketplace.

CHARTING

ChartAI

AI-powered chart analysis embedded in TradeSuite. Powers signal generation across the platform.

CUSTODY

XI Wallet

Multi-chain mobile wallet. 20 chains. Industry-first security: duress PIN, stealth addresses, RPC privacy.

VISIBILITY

Portfolio Tracker

6 EVM chains + Solana + 9 exchanges in one view. Free tier. Read-only by design.

INDUSTRY FIRST

Duress PIN & Decoy Wallet

Two PINs. The duress PIN opens a convincing decoy while silently freezing real assets.

ERC-5564

Stealth Addresses

Public address never appears on-chain. First mainstream mobile wallet to implement Vitalik's spec.

NETWORK

RPC Privacy

Every blockchain query routed through our backend with IP stripped.

LOCKOUT

24h Auto-Freeze

Suspicious activity triggers lockout. Full unlock requires a 64-char physical recovery key.

PRE-SIGN

BOT TRADING

Institutional-grade automation, retail-grade UX.

15

EXCHANGES

6

BOT TYPES

7

NOTIFICATION CHANNELS

20%

MARKETPLACE FEE

- Webhook-driven hedge bots with cooldown enforcement
- Account-level fail-safe layer (max daily loss, kill switch, drawdown caps)
- Copy-trade execution engine with verified performance leaderboards
- Portfolio sync, position health, ATR regime detection

Open marketplace. Free to start. Creators earn from rentals.

Free user

Rents bot

Creator earns 80%

Platform 20%

Free tier

Unlimited rentals from the marketplace. Portfolio tracker. Browse everything. Trial of full platform for 48h.

Paid tier

\$39.99/mo or \$399.99/yr. Unlimited self-bots. All exchanges, all bot types, all features.

Creator economy

Sell access to your bot templates. 20% platform fee. Verified performance. Chargeback protection.

Every paid subscriber unlocks a bot slot for one creator. Network effect baked in.

TIMING

Three converging tailwinds.

01

Mobile-first crypto

Every new wallet user starts on phone. Desktop-only platforms miss the entire next cohort.

02

Privacy as table stakes

Wrench attacks, data breaches at major RPC providers, hostile jurisdictions. Users now shopping for privacy-first wallets.

03

Bot trading goes mainstream

What used to be a Discord-and-API niche is now consumer-grade. First platform to nail trust + UX wins it.

UNDER THE HOOD

Built to handle real money.

Backend

Laravel 10 / PHP 8.3 / MariaDB. PM2 supervisor for WebSocket processes, queue worker, scheduler.

Mobile

React Native (bare workflow). Custom Secure Enclave / StrongBox native bridges for key storage.

Security

AES-256-CBC encryption at rest. HMAC-SHA256 webhook verification. EIP-712 signing for DEX protocols.

Infrastructure

Plesk / Ubuntu 24.04 / nginx. Zero telemetry. Zero analytics. Open REST endpoints for public data only.

WHY US

What we have that nobody else does.

CAPABILITY	XETAAI	MOST PLATFORMS
Multi-product ecosystem (wallet + trading + charts + portfolio)	✓	—
Industry-first wallet security (duress PIN, stealth addresses)	✓	—
Open creator marketplace with verified performance	✓	—
15 exchanges (9 CEX + 6 DEX) on one bot platform	✓	CEX only
Free-tier portfolio tracker across 6 chains + 9 exchanges	✓	—
DEX bot support (Hyperliquid, dYdX, Aevo, Paradex, Drift, Vertex)	✓	CEX only

WHAT'S NEXT

The next twelve months.

SHIPPED (LAST 12MO)

Full platform launch

TradeSuite v1, ChartAI, marketplace, fail-safe layer, ATR Dynamic Grid, portfolio tracker, free tier, public marketplace, XI Wallet on stores.

Q2 2026

XI Wallet major update

17 new chains, duress PIN, stealth addresses, hardware wallets, cross-chain swaps.

Q3 2026

Wallet ↔ TradeSuite integration

WalletConnect v2. Sign bot transactions from the wallet. Deep linking.

Q4 2026

Scale

Institutional tier, additional regulated jurisdictions, native mobile TradeSuite app.

WHO'S BUILDING

Operators, not pitch-deck founders.

Mike

FOUNDER

Co-founder and lead wallet developer. Builder of XI Wallet from the ground up.

Martin

CO-FOUNDER

Co-founder and lead TradeSuite developer. Builder of the trading platform and marketplace.

Additional team and advisory detail available on request.

NEXT STEPS

We're opening conversations with strategic partners.

If the thesis resonates, we'd love to walk you through the platform live, share roadmap detail, and discuss how a partnership could accelerate the next phase.
